

Armando Borge

San José, Costa Rica • www.armandoborge.com

Professional Summary

I'm a software engineer with hands-on experience developing scalable systems and reliable cloud architectures. My work combines deep technical knowledge in infrastructure automation, secure application design, and full-stack development, alongside leadership in collaborative engineering environments.

With end-to-end experience (from databases and infrastructure to front-end development and system integrations) I bring a generalist mindset with both big-picture perspective and attention to detail. This versatility, along with the ability to adapt and learn quickly, makes me a valuable, reliable contributor in any team setting.

Work Experience

Principal Web Architect

[Tribu Yoga](#)

2023-2025
Tallinn, Estonia

Tribu Yoga is a SaaS platform for managing yoga studios, with operations across Latin America and Europe.

- Responsible for all technical strategies and its proper execution
- I led the architectural design and implementation of scalable systems
- Ensured tech decisions were aligned with business goals by doing extensive researches on different technologies and stacks
- Collaborated closely with stakeholders and oversaw technical roadmaps from idea to deployment
- Worked across the entire stack to ensure high quality, performance, security and scalability across all the distributed systems

Lead Cloud Architect

[Airbank GmbH](#)

2021-2023
Berlin, Germany

Airbank was a Berlin-based fintech startup founded in 2021 focused on helping SMEs manage their cash flow and accounts in one place. The company was acquired by Pliant GmbH in 2023.

- I led all things related to cloud systems
- Designed secure and scalable infrastructure using AWS and GCP
- Coordinated penetration testing with third parties companies
- Performed security audits
- Implemented best practices on the cloud resources company wide
- I worked closely with developers to deliver cloud-native, reliable systems

Co-Founder & CTO

[Tripping Cats OÜ](#)

2019-2021
Tallinn Estonia

Tripping Cats OÜ is a software development and design studio based in Estonia, specializing in building Software as a Service (SaaS) platforms using modern web technologies and cloud infrastructure.

- Led architecture and development across multiple projects
- Worked with a wide range of web stacks and cloud providers
- I helped define the technical strategies and plan product roadmaps
- Managed development cycles to deliver polished applications alongside a small remote team of top-tier talent
- Worked as Full-Stack developer
- Worked as CTO

Senior Front-End Developer

[Eleven Systems LLC](#)

Eleven Systems provides software for high-net-worth individuals to manage assets, messaging, and personal data.

- I built front-end architectures for complex web and mobile apps.
- Worked on several teams using Angular React, and Swift on different projects
- In charge of code reviews to ensure code quality, security and performance
- Worked on CI/CD pipelines and maintainable codebases for various projects
- Worked implementing security best practices for Front-End systems

2015-2019

California, United States

Senior Back-End / Front-End Developer

[Alinean Inc.](#)

Alinean developed B2B sales enablement tools like ROI calculators and product comparison platforms, later acquired by Mediafly. I worked translating design specs into interactive front-end components, as part of the core development team, contributing to tools used by Fortune 500 clients.

2013-2015

Florida, United States

PHP Back-End / Front-End Developer

[Cambio Labs](#)

Cambio Labs was a U.S.-based digital agency focused on websites for small businesses. I worked translating PSDs into responsive, interactive pages and helped maintain and develop new features for their custom sales and inventory system. My focus was clean code and fast/modern user interfaces.

2012-2013

Utah, United States

UI/UX Designer & Front-End Developer

[Othos Telecomunicações](#)

Othos is a Brazilian telecom company offering VoIP solutions to businesses across Latin America and South Africa. I've partnered with engineers to build front-end interfaces that abstracted complex systems into simple, user-friendly dashboards, improving overall usability and adoption.

2011-2012

São Paulo, Brazil

Full-Stack Developer

[Mia Films Network](#)

Mia Films developed a dating platform called Seat For Two. I joined as a Full-Stack Developer, creating MySQL schemas, building backend logic in PHP, and developing user-facing components. After the project launched successfully, a new company was formed for it, and I took on a leadership role in front-end development for the new venture.

2008-2010

San José, Costa Rica

Education & Certifications

Google Certified Associate Cloud Engineer

2023

Earned the Associate Cloud Engineer certification from Google Cloud, demonstrating proficiency in deploying, managing, and monitoring cloud applications and services. Validated skills in Google Cloud Console, command-line tools, and core services such as Compute Engine, Cloud Storage, and IAM. Proven ability to configure cloud environments for security, reliability and scalability.

AWS Certified Cloud Practitioner

2021

Achieved the AWS Certified Cloud Practitioner credential, confirming a foundational understanding of AWS Cloud concepts, core services, billing and pricing models, and security best practices. Demonstrated ability to articulate cloud value propositions and navigate the AWS global infrastructure.

Computer Science Licentiate Degree

[Adventist University of Central America \(UNADECA\)](#)

Continued education on Computer Science.

2017
Alajuela, Costa Rica

Computer Science Bachelor's Degree

[Adventist University of Central America \(UNADECA\)](#)

Completed a comprehensive program covering software engineering, data structures, algorithms, operating systems, databases, and computer networks. Gained strong foundations in programming (PHP, JavaScript, C++, Web Development), problem-solving, and system design. Engaged in hands-on projects that emphasized real-world application of theoretical concepts and collaborative development practices.

2013
Alajuela, Costa Rica

Additional

Language Skills:

I speak **Spanish** and **English** as natural languages, I am currently learning **Italian**.

Technical Skills:

JavaScript, PHP, CSS, HTML, Swift, C#, C++, Node.js, SQL, MongoDB, FaunaDB, AWS, Google Cloud Platform, Terraform, Angular.js, React, Astro, Gatsby, Next.js, jQuery, TailwindCSS, PWA, GraphQL, Docker, Gulp, Grunt, GitHub, Zend Framework, CodeIgniter, SASS/LESS, WordPress, Joomla.
